Introducing the fully autonomous UV-C disinfection solution to protect your fans, visitors and staff from the invisible infection threat

UVD
ROBOTS

360 DEGREE ENVIRONMENTAL DISINFECTION to give your fans, visitors and staff 'peace of mind'

Ensuring your stadium, arena or convention center is disinfected is of huge importance so spectators and guests can feel safe and comfortable.

The agility and autonomy combined with UV technology of the UVD Robot provides you with a superior level of protection against pathogens enabling easy and efficient disinfection of large areas.

VALUE YOUR FANS, VISITORS AND STAFF. VALUE DISINFECTION.

The new normal is here and has impacted the way we consider large scale gatherings. People are now fully aware of their personal space and their expectations for cleaning and disinfection has changed.

The use of a UVD Robot to disinfect your arena or convention center will allow your fans, visitors and staff to enjoy a cleaner and safer experience.

EFFECTIVE AGAINST SARS-COV-2

In June 2020, the company supplying the UV-C lamps mounted on the UVD robot commissioned clinical trials to test the efficacy of their lamps against SARS-CoV-2.

The test was carried out at The National Emerging Infectious Diseases Laboratories (NEIDL) at Boston University in the US with the university concluding that a dose of 22mJ / cm² would reduce the virus by 99.9999%.

As the robot drives by it delivers approximately **70mJ/cm² of UV-C**

3 x the dose required to reduce SARS-CoV-2

by **99.9999%**

UVD ROBOT AT SUPER BOWL 2021

UVD Robots was at the big game, at the home of IP Program in Tampa Florida. IP Program was assisting the Tampa Bay Super Bowl LV Host Committee at One Buc Place with UV Disinfection services deploying UVD Robots in cooperation with Tampa General Hospital.
